Definisjoner

Def. fra Encyclopædia Britannica

<http://www.britannica.com/EBchecked/topic/462640/plagiarism>

plagiarism, the act of taking the writings of another person and passing them off as one's own. The fraudulence is closely related to forgery and piracy—practices generally in violation of copyright laws.

If only thoughts are duplicated, expressed in different words, there is no breach of contract. Also, there is no breach if it can be proved that the duplicated wordage was arrived at independently.

Def. fra Merriam-Webster:

plagiarize - to steal and pass off (the ideas or words of another) as one's own : use (another's production) without crediting the source.

Pastisj: Def fra Encyclopædia Britannica

<http://www.britannica.com/EBchecked/topic/213587/forgery/69715/Forgery-in-the-visual-arts?anchor=ref584749>

In the composite fraud, or **pastiche**, the forger combines copies of various parts of another artist's work to form a new composition and adds a few connecting elements of his own to make it a convincing presentation. This type of forgery is more difficult to detect than the copy. Such a combining of various elements from different pieces can be very deceptive, because a creative artist often borrows from his own work. In fact, the similarity of a figure or an object in a forgery to that in a well-known work of art often adds to the believability of the new creation.
